

Projects

Hanover School London

Client Hanover Primary School
Value £5.7 million
Status On Site

Rolfe Judd was commissioned by Hanover School to refurbish existing buildings and to design new blocks that will expand and enhance the school's facilities. Classrooms will be re-organised and daylight access to the heart of the building will be improved to create a more comfortable teaching and learning environment.

Rolfe Judd designed the refurbishment of Hanover School's 1930s building to achieve BREEAM 'Very Good' rating. Key sustainability features include the new electrical systems, such as highly efficient lighting, zoned two pipe heating, natural ventilation and insulation. The new sports hall extension, which is set to be carbon neutral, incorporates energy-saving features, such as PV panels, air source heat pumps and rainwater recycling.
